Conditions:

All systems must be installed by a licensed plumber, include a PIC certificate, and have receipts for greywater system and subsurface irrigation components and be compliant with EPA publication 812.2.

Greywater systems may require a council permit, please check with your local council for its requirements.

TREATMENT TYPE GREYWATER SYSTEMS

All eligible Treatment Type Greywater systems are listed on the Environment Protection Authority's website at: <http://epanote2.epa.vic.gov.au/epa/septic.nsf/>

These systems are listed under the headings of **Greywater Only and All Wastewater or Greywater**.

Note that only systems that treat only greywater are eligible for the Water Smart Gardens and Homes Rebates.
